

# DEVELOPMENTAL COURSES

---

Developmental courses help students attain basic skills in reading, English and mathematics so that they have a better chance at success in college-level courses. Valencia offers developmental courses in reading, mathematics, English and English as a second language for academic purposes. Developmental courses do not apply toward an associate degree or technical certificate.

For course level placement, which is based on entry testing, each of the three skill areas of reading, English and mathematics are independent of each other. You may place at the college level in one area and at the developmental level in other area(s).
