Degrees and Certificate Programs

Valencia College offers the choice of three degrees:

• Associate in Arts (A.A.)
• Associate in Science (A.S.)
• Bachelor in Science (B.S.)

Briefly, the degrees can be distinguished as follows:

1. The A.A. degree is designed for the student who plans to transfer to a Florida public university or state college as a junior to complete a Bachelor’s degree. Through the A.A. degree, Valencia offers lower division preparation for almost all of the approximately 200 majors in the State University/State College System of Florida.

   The Associate in Arts degree pre-majors are designed for students who know their intended major, plan to earn the A.A. degree from Valencia, and want to transfer to a state university or state college in Florida as a junior to complete a Bachelor’s degree in one of the specific majors for which Valencia has a pre-majors. Valencia also offers Articulated pre-majors for transfer to private institutions in Florida.

   The Associate in Arts degree is available for students who want a college degree and have not selected a pre-major for transfer to a state university or state college in Florida and for students who plan to transfer to a private and/or out-of-state institution.

   Although the pre-majors provide the best preparation for transfer to specific majors in Florida’s State University or College System, a student still may choose the Associate in Arts for a variety of reasons.

   The Associate in Arts degree and the pre-majors are described in full in the University Parallel Program section of this catalog.

2. The A.S. degrees are designed to prepare students to enter careers upon completing a degree, with no further study required. Valencia offers approximately 35 A.S. degrees ranging from Accounting to Restaurant and Food Service Management.

   Certain A.S. degrees articulate with Bachelor’s degree programs in Florida’s public university system. These degrees, called Articulated A.S. to B.A./B.S. Career Path degrees, are designed for students who seek immediate employment in the specified field and who decide to continue to a Florida public university as a junior to complete a Bachelor’s degree in the specified field.

   In addition, many articulation agreements between Valencia and specific programs at various public and private four-year institutions provide opportunities for A.S. degree graduates to continue their educational pursuits to Bachelor’s degree programs.

   For further information, visit valenciacollege.edu/asdegrees/transferagreements.cfm

   Some state universities have recently begun to offer the Bachelor of Applied Science degree (B.A.S.) for personal or career advancement. The B.A.S. is designed to build on the Associate in Science degree.

   The A.S. degrees are described in full in the Career Programs Section of this catalog.

   If you are interested in an Associate in Arts or an Associate in Science degree, you should read the catalog carefully to learn the requirements and characteristics of each degree. You should also review the career areas of the Student Handbook to explore career options.

3. The Bachelor in Science degree is an upper level degree that offers students an opportunity to continue their degree beyond the Associates degree. Students who have earned an A.S. degree may have to complete additional hours of General Education courses, and they must complete a foreign language proficiency if they have not already done so.

Important Notes:

1. Your governing catalog is the Valencia College catalog in effect at the time of your initial enrollment in associate or bachelor’s degree credit courses at Valencia. A Valencia catalog is valid for five academic years provided you are continuously enrolled (including summer). If you are applying to a limited access program and the admissions requirements change within your five year catalog time period, you will qualify for a transition plan to the new requirements. Your governing catalog will be updated to the Valencia College catalog in effect at the time of your enrollment in the limited access program. You may officially declare any subsequent catalog as your governing catalog and follow its requirements for your initial degree or certificate program until that catalog expires; however, if you change your degree or certificate program, you are required to choose from the current degree and certificate program offerings and follow the graduation requirements of the current catalog. If your governing catalog has expired, your new governing catalog will be the catalog in effect in your next term of enrollment. Should the District Board of Trustees approve changes in program requirements to be effective within the academic year, the revised requirements will be available in the catalog, academic departments, and Career Program Advisor’s offices. Students affected by the change in requirements should contact the appropriate Program Advisor, Program Director, or Academic Dean.
2. Limited access status occurs when student demand exceeds available resources such as faculty, instructional facilities, equipment, etc. Admission to Valencia does not guarantee acceptance to a limited-access degree program in which the number of students who can enroll is limited. Limited-access programs have specific admission requirements. Degrees with limited-access status are indicated with the program information in this catalog.

3. You may earn any number of Associate in Science degrees as well as one Associate in Arts degree; however, you may not earn the Associate in Arts degree at Valencia if you have earned an Associate in Arts or Bachelor’s degree from an institution that has regional accreditation in the U.S., or if you have earned the equivalent an Associate in Arts degree or a Bachelor’s degree in a foreign country.

If you want to earn more than one degree at Valencia, you may complete the first degree and then pursue another degree or you may pursue two degrees at the same time. Whenever possible, a course will be applied to more than one degree. Students who have an earned Associate in Arts or Bachelor’s degree in a foreign country are eligible to complete the general education requirements.

4. For all degree programs, specific courses have been designated to demonstrate that graduates of these programs are competent in reading, writing, oral communication, fundamental mathematical skills and the basic use of computers. In some programs, skill sets and formally evaluated learning activities for the areas of oral communication and the basic use of computers have been incorporated in traditional general education or other course work related to the degree. In cases in which such designated courses are transferred from other institutions, students must demonstrate proficiency in oral communication and/or the basic use of computers by completing or having completed a specific course in the area of speech (for oral communication) and/or a specific course in the area of computer technology (for the basic use of computers).
