

# ADVANCED TECHNICAL CERTIFICATES

---

The Advanced Technical Certificate (ATC), an extension of a specific Associates in Science, Associate in Applied Science, or higher degree program, consists of at least nine (9), but less than 45, credits of college-level course work. Students who have already received an eligible degree and are seeking a specialized program of study to supplement their degree may seek an Advanced Technical Certificate. Students will receive a certificate upon completion of the program. There is an additional fee of \$15 for the program application for all Advanced Technical certificates except for Leadership in Healthcare. This fee must be paid at the Business Office prior to submission of the program application.
