

COMPUTER AIDED DRAFTING & DESIGN

Associate in Science Degree (CIP# 1615130202)

This program is designed to train technicians to assist engineers by translating ideas, rough sketches, specifications and calculations into complete and accurate working drawings. In addition, instruction is given in three CADD (Computer Aided Drafting and Design) courses which prepares the student for employment with institutions using computer assisted engineering and design.

Students are strongly encouraged to consult a student success coach in the department office for assistance in determining the best education plan for their career goals.

Although scheduling may not always provide for the following progression of courses, students should use the foundation, intermediate and advanced course sequence as a guide in program planning.

All degree-seeking students must satisfy entry testing requirements and satisfactorily complete all mandatory courses in reading, student success, mathematics, English, and English for Academic Purposes in which the student is placed.

Alternative Ways to Earn Credit toward this Degree

Graduates of specific programs at Orange Technical College and Osceola Technical College, as well as other institutions may be eligible to receive college credit for courses in this program. You may also be eligible to receive credit toward this degree if you have earned one of the approved Gold Standard industry certifications or Career Pathways credit. To learn more about Valencia's award of credit options, visit <https://valenciacollege.edu/academics/programs/as-degree/alternative-award-of-credit-agreements.php>. Eligible students should contact the Student Success Coach in their academic department for more information about the requirements for the award of credit.

College Credit Technical Certificates

The Drafting and Design A.S. degree also offers the following college credit certificate programs. These certificates can put you on the fast-track to reaching your career goals. They are designed to equip you with a specialized skill set for entry-level employment or to upgrade your skills for job advancement. Most can be completed in one year or less, and all of the courses in the certificates are embedded in the A.S. degree. You can earn the certificates as you progress through your A.S. Degree or as a separate, stand-alone credential. Click on the Certificate tab at the top of the page for more information about the certificates that are offered.

- Advanced Computer-Aided Design with Specializations in: (24 credits)
 - Architectural Drafting (CIP # 0615130200)
 - Mechanical Drafting (CIP # 0615130200)
 - Surveying Drafting (CIP # 0615130200)
- Computer-Aided Design (15 credits) (CIP # 0615130204)
- Rapid Prototyping Specialist - 3-D Printing (12 credits) (CIP # 0615130211)

Start Right

Degree-seeking students enrolling at Valencia for the first time will have a limited range of courses from which to choose for their first 18 college-

level credits. Within the first 18 college credit hours, you will be required to take ENC1101 (3 credits), ETD 1031C (3 credits) and a mathematics course appropriate to your selected meta-major (3 credits). The remaining courses will be chosen from the General Education Core Courses in humanities (3 credits), science (3 credits), and either POS 2041 or AMH 2020 (3 credits), and/or the introductory courses within the A.S. degree programs. For specific courses see the *Foundation Courses* on the "Program Requirements" tab. For course sequencing recommendations, see your Student Success Coach or create an education plan by logging into Atlas, clicking on the LifeMap tab and clicking My Education Plan.

Potential Careers

- Drafting and Design Technician
- Mechanical Engineering Assistant
- CADD Operator/Specialist
- CADD Drafting Technician/Specialist
- Mechanical Drafter
- Architectural Drafter
- Drafting Designer
- Tooling Drafter

Program Outcomes

- Accept professional and ethical responsibilities required by industry.
- Communicate effectively with technical and non-technical audiences.
- Analyze systems and processes used to create the built environment.
- Solve design problems using algebraic and trigonometric functions.
- Efficiently utilize current professional software to generate 2D and 3D drawings.

All specialized program courses are offered on the West Campus and may not be offered every session; some specialized courses are offered at other locations.

Expand your career opportunities with a Bachelor's Degree in Business and Organizational Leadership (BASBOL) from Valencia. This degree builds on your skills, and prepares you for a supervisory or management role within your respective field. For more information, go to: Bachelor's Degree in Business & Organizational Leadership (<http://catalog.valenciacollege.edu/degrees/bachelorofscience/bas/>). Students who wish to continue their education should consult with a Student Success Coach to determine the best education plan for their career goals.

Students wishing to transfer credits from this program to another institution must accept responsibility for securing approval from the transfer institution for acceptance of this degree.

Advanced Computer Aided Design with Specializations in

- Architectural Drafting
- Mechanical Drafting
- Surveying Drafting

Technical Certificate

This program is designed to prepare individuals for entry-level positions in architectural, mechanical, and surveying drafting that require computer-aided drafting skills. The content prepares the student to draw, dimension, and print drawings by computer in the respective specialization area.

Rapid Prototyping Specialist

Technical Certificate

This certificate is intended for students to learn the fundamentals of rapid prototyping to analyze designs and create 3D models using a variety of 3D scanners and printers. The basics of solid modeling software, primarily Solidworks, will be explored in the creation of STL (StereoLithography) files for 3D printing. Design Analysis techniques will be used to analyze models for appropriate design concepts and material usage. Working in a collaborative team environment, students will learn to effectively analyze model results for successfully achieving design parameters.

Program Outcomes

- Efficiently utilize current professional software to generate 3D digital models.
- Demonstrate understanding of the concepts, applications, and hardware used in digital manufacturing processes.
