

COMPUTING TECHNOLOGY AND SOFTWARE DEVELOPMENT

Bachelor of Applied Science in Computing Technology and Software Development (CIP# 1101101034)

The Bachelor of Applied Science in Computing Technology and Software Development provides students the opportunity to earn a degree which prepares students to analyze software problems, plans, and solutions to design a logical plan for program requirements; implement software solutions and communicate effectively in writing and orally regarding the solutions; demonstrate collaborative skills in team settings to plan and accomplish software solutions; and apply ethical concepts to design solutions. The curriculum emphasizes practical, real-world problems.

Potential Careers

- Software Developers
- System Software Developers
- Computer and Information Systems Managers
- Computer Systems Analysts

 - MAC 1105, MGF 1106, STA 2023 or higher level math.
- Completion of one of the following:

- an Associate in Arts (A.A) degree** from a regionally accredited institution with a minimum of 60 semester hours of course work and a 2.0 overall Grade Point Average (GPA), or
- an Associate in Science (A.S.) degree** in of the following areas: Computer Programming & Analysis, Computer Information Technology, or Network Engineering Technology from a regionally accredited institution with a minimum of 60 semester hours of course work and a 2.0 overall Grade Point Average (GPA), or
- at least 60 semester credit hours of college level course work at a regionally accredited institution, including 15 credits that are applicable to Valencia College's General Education Program requirements, with a minimum of a 2.0 overall Grade Point Average (GPA) .

*Course not offered at Valencia but will be accepted for admission if transferred from another Florida public institution

**Other Associate or higher degrees must be formally evaluated by the Computing Technology Department for admission.

Program Requirements for Students Entering with an Associate in Science Degree

Program Outcomes

1. Analyze software problems, plans, and solutions to design a logical plan for program requirements.
2. Implement software solutions and communicate effectively in writing and orally regarding the solutions.
3. Demonstrate collaborative skills in team settings to plan and accomplish software solutions.
4. Apply ethical concepts to design solutions.

Students with an A.S. degree

Students who have completed an Associate in Science (A.S.) degree from a regionally accredited institution must complete:

- + This course must be completed with a grade of C or better
 * This course has a prerequisite: check description in Valencia catalog.
 ~ This is a general education course.
 (GR) Denotes Gordon Rule course.

¹ (To fulfill this requirement, students with GEB 1011 are advised to take any GEB, MAN, MNA, MKA, ACG, CGS, CIS, COP, CTS, or COT course, or a CET course with program chair approval, or any upper division BASCTSD elective.)

Graduation Requirements:

In addition to completing the course requirements detailed in the curriculum in order to graduate, students must:

- Earn a minimum 2.0 Valencia College and Overall GPA.
- Complete all Core course work with a minimum grade of C (2.0) in all core courses.
- Satisfy Valencia's 36 credit hour General Education requirements and Gordon Rule requirements unless you hold an Associate in Arts or Bachelor's degree or have completed the entire general education program at a regionally accredited institution.
- Satisfy the civic literacy requirement. As per Florida Rule 6A-10.04213, prior to the award of an associate in arts or baccalaureate degree, students initially entering a Florida College System institution in the 2021-22 school year, and thereafter must demonstrate competency in civic literacy prior to graduation by:
 - successfully passing POS 2041 U.S. GOVERNMENT or AMH 2020 U.S. HISTORY 1877 TO PRESENT and
 - successfully passing a prescribed assessment:
 - AP Government & Politics: United States Test* (passing score = 3), or
 - AP United States History Test* (passing score = 4), or
 - CLEP American Government* (passing score = 50), or
 - Florida Civic Literacy Test (FCLE passing score = 48)
 *receiving a passing score will satisfy both the FCLE and course requirements.
- Complete at least 25% of the 120 credit hour degree program (30 credits) at Valencia College, based upon the Florida College System's requirement of a 2+2 admission into the baccalaureate program. Fifteen of those hours must be 3000 or 4000 level courses from the program course list.
- Submit an application for graduation through Atlas by the deadline date listed in the Academic Calendar in the online official catalog. The student must have at least the minimum number of college-level credits for the degree, including all courses currently registered, in order to submit a graduation application.
- Fulfill all financial obligations to Valencia College.
- Foreign Language: Successfully complete the Florida foreign language requirement: two years high school or one year of college (at least eight credits) in a single foreign language. American Sign Language is acceptable. Foreign language taken at the college level does not satisfy the General Education credits.

Total Semester Credits required – 120 credit hours in addition to completing the Foreign Language Requirement above. The credit courses required may vary depending on the credits the student brings to the BAS program. Additional courses to complete the required 120 credit hours for graduation must apply to the degree and be approved by an advisor.

Students who have completed core courses prior to entering the BAS program may substitute lower level COP, COT, CIS, CTS, or CET prefix courses or CGS 2786C with advisor approval.

Program Requirements for Students Entering with an Associate in Arts Degree

Program Outcomes

1. Analyze software problems, plans, and solutions to design a logical plan for program requirements.
2. Implement software solutions and communicate effectively in writing and orally regarding the solutions.
3. Demonstrate collaborative skills in team settings to plan and accomplish software solutions.
4. Apply ethical concepts to design solutions.
